**Smart Router connection guide**

**Introduction**

This guide will take you through three sections to get your laptops, mobile phones, tablets and other devices connected wirelessly. Complete every step within each section before moving on to the next section.

Sections:

1. Connect your Smart Router
2. Set up your wireless home network
3. Connect your wireless devices to your home network

Write your new WiFi name (SSID) and password/pin on this sticker and keep it somewhere safe.

---

**Section 1 | Connect your Smart Router**

What’s already installed

- Modern
- Smart Router
- Electrical outlet

What you need to set up

- Ethernet cable from the modem to the back of your existing router. If you’re using a battery backup, you’ll also need to unplug the power cable from the modem and disconnect the battery backup. If you’re using a modem and disconnect the battery backup, if you’re using a modem and disconnect the battery backup, if you’re using a modem and disconnect the battery backup.
- Connect the Ethernet cable from the modem to the back of your existing router. If you’re using a battery backup, reconnect it.
- Unplug the power cable from the modem. If you’re using a battery backup, you’ll also need to unplug the power from your modem.

For wired connections only

- 5
- Plugging the power cable from the back of your modem and reconnecting the battery backup.
- 7
- You’ll need the default WiFi name (SSID) and password/pin found on the bottom of your modem as shown.

You’ve installed the default WiFi name (SSID) and password/pin found on the bottom of your router. You can now upgrade your Optimum account using your Optimum ID.

---

**Section 2 | Set up your wireless home network**

PC

1. Go to Settings and select WiFi.
2. Select the WiFi name (SSID) you established in Section 2 and enter your password/pin.

Mac

1. Go to Settings and select WiFi.
2. Select the WiFi name (SSID) you established in Section 2 and enter your password/pin.

Android devices (may vary depending on model):

1. Go to Settings and select WiFi.
2. Select the WiFi name (SSID) you established in Section 2 and enter your password/pin.

Do you have all these parts?

- Smart Router
- Electrical plug
- Ethernet cable

You’ll need the default WiFi name (SSID) and password/pin found on the bottom of your Smart Router as shown.

If you’re replacing an existing router, use your current WiFi name (SSID) and password/pin to set up your new Smart Router. Your devices should automatically connect.

---

**Section 3 | Connect your wireless devices to your home network**

You’re now ready to enjoy the best wireless internet experience in your home. This section shows the most common WiFi connections to help you set up all of your devices on your home network.

**Manage your home network**

Adjust your settings

- All devices on your network can see each other. Connect your WiFi name (SSID) and password/pin, security and more—anytime.

Optimum ID

You need to create a new Optimum account using your Optimum ID and password. If you need to use a new Optimum ID or password, go to optimum.net/idinfo, Channel 903 or Explore Optimum Channel 900.

A few tips to keep in mind

Having trouble connecting? Try these steps:

1. Make sure all your cord connections are tightly secured.
2. Make sure your Smart Router is not obstructed by anything. If you already have an existing WiFi name (SSID) and password/pin for your current router, have them somewhere handy. You will need them.
