These instructions will guide you through installing or replacing a Gateway 5.

1. **UNPLUG EXISTING EQUIPMENT**
   - If you’re replacing a modem, router or Gateway, disconnect everything from your existing equipment.

2. **Connect the open end of your coaxial cable to the back of the new Gateway.**

3. **Plug the Gateway power cord into the back of the device.**

4. **Plug the other end of the power cord into an electrical outlet.**

5. **The Gateway is ready for the next step when the top 3 lights (POWER, DS/US, ONLINE) on the front panel are solid green. This may take a few minutes.**

6. **Sign in at optimum.net/gateway to personalize your in-home WiFi network name, also called a SSID, and your password. Can’t remember or don’t have an Optimum ID? Visit optimum.net/idhelp**
   - If you’d rather use the defaults, look at the label on the bottom of the Gateway. Note, your password will be listed as the “Wi-Fi Pre-Shared Key”.

7. **To connect to the Internet, go to WiFi settings on your device. Select your in-home WiFi network name from the list and when prompted, enter your password. Repeat this step for all of your connected devices.**

8. **If you have an Altice One Mini, you need to re-pair it to the Gateway. Refer to the “Replacing an Altice One Mini” instructions at optimum.net/guides. If not, you’re all set!**

9. **If you replaced a modem, router or Gateway, make sure to return your old equipment. Learn how at optimum.net/return**
